CAMPUS FORMULA PATHWAYS

Campus Formula Pathways

Organisation profile

We help secondary school students and school leavers understand their admission options and prepare their next steps. Through free guidance sessions, we bring practical admission education to schools, churches, mosques, tutorial centres, and youth organisations.

Why we exist

Students can work hard towards admission and still lack essential information about their choices, requirements, or preparation. Campus Formula Pathways helps them ask the right questions early, check reliable information, and develop a practical plan.

Our mission

To help students make informed admission decisions through clear guidance, practical preparation, and access to credible information about tertiary education pathways.

Our admission readiness session

Our introductory session lasts up to 60 minutes and is designed for SS3 students, secondary school leavers, and prospective UTME candidates. Content is adapted to the audience and available time.

- Course choices, subject combinations, and institution requirements.
- An introduction to admission routes, including IJMB, JUPEB, and qualification pathways to investigate.
- Document readiness, application planning, and common mistakes.
- Study strategies and a brief demonstration of Campus Formula CBT.
- A personal admission action plan and time for questions.

What students take away

Participants identify requirements they need to verify, options they want to explore, and three practical next actions. A compact worksheet supports the session; digital resources are planned for the Pathways website.

Participation is free. Initial outreach coverage is Lagos, Ogun State, and Ibadan.

CAMPUS FORMULA PATHWAYS

Programme leadership and hosting

Toluwani Abimbola

Team Lead, Campus Formula Pathways | Founder and CEO, Campus Formula

Toluwani is a software developer, entrepreneur, and youth leader. He founded Campus Formula in 2021 to help students prepare for computer-based examinations through accessible digital learning tools. He also works as a Software Developer at Smartteller.

Since 2024, he has served as Teens Coordinator at RCCG The Possibility Church, mentoring teenagers and organising activities that support their development. In 2025, he served as President of his Departmental Fellowship at Yaba College of Technology. He obtained his HND in Statistics from the institution in February 2026.

Host a session

We welcome enquiries from organisations serving secondary school students and school leavers. To plan a visit, share your location, audience, estimated attendance, preferred date, and available session time.

We prepare the session and student action worksheet. The host appoints a contact person, mobilises participants, and agrees venue and equipment arrangements with us. Each engagement is confirmed after a discussion of availability and scope.

Our approach to guidance

We teach students how to check official requirements for their intended course, institution, and admission session. Institution-specific information must be verified before use. Our sessions provide guidance; admission decisions remain with the relevant institutions and authorities.
